

# Reception Summer Term 1 Home Learning Menu

\* Please choose **one activity** with your child each week to complete and then send in a picture to Tapestry so that we can monitor home learning and celebrate achievements with the class.

Kind regards The Reception Team

Design and make a healthy hero snack.  
click [here on Cbeebies](#) for some healthy ideas.

Captain Superbrush needs your help to teach all the children how to brush their teeth correctly. Make a poster with some instructions explaining how to brush your teeth.

You could draw pictures, take photos and or write sentences explaining how.  
[Click here](#) to access a video with Hey Duggee explaining how to brush.

Make a Super hero, headquarters or vehicle using recycled materials.

You can practice your disappearing writing by filling up an empty washing up liquid or squirty bottle with water and writing your tricky words (from your Floppy's phonic book) on the pavement outside. You could use water and a paint brush as an alternative.

Make and solve your own Superhero addition number sentences (see example below). You could also do this with objects and take photos instead. Remember to solve the question and write the answer.

$$\begin{array}{c}
 \text{Superhero} \\
 + \text{Superhero} \\
 + \text{Superhero} \\
 + \text{Superhero} \\
 + \text{Superhero} \\
 = \text{ }
 \end{array}$$

Draw a picture of what a Superhero does in the morning, in the afternoon and at night.

Draw a picture of your Superhero vehicle or headquarters. Label it to show all the special things it can do.

What Superhero would you be and why? Talk about what superpowers you would have and why? Ask another person in your house the same questions (Parents and Carers, please encourage lots of different vocabulary and description – ask your child to tell you more to help them expand their answers). You can record these answers if you wish and post them on Tapestry or you might like to draw / write them down.

Superheroes need to stay fit and healthy. Can you do 10 star jumps, 10 hops and then 10 jumps as high as you can. Now you can make up your own fitness routine. You may want to make a book and draw in the different steps or you could take photos with instructions for your superhero friends to try in class.
